New Product Announcement

Introducing Hydra Breathable Underlayment

FT Synthetics is pleased to announce our new product, **HYDRA** a synthetic breathable roofing underlayment designed to add an extra layer of protection from water penetrating your roof and at the same time help the release of trapped moisture due to poor attic ventilation. **HYDRA** has high permeability (16 Perms), a durable 3 layer construction, up to 6 months UV exposure, and a 40-year limited warranty. **HYDRA** features our slip resistant GRIPSPOT™ technology top surface for superior walkability during installation.
